- Wolf

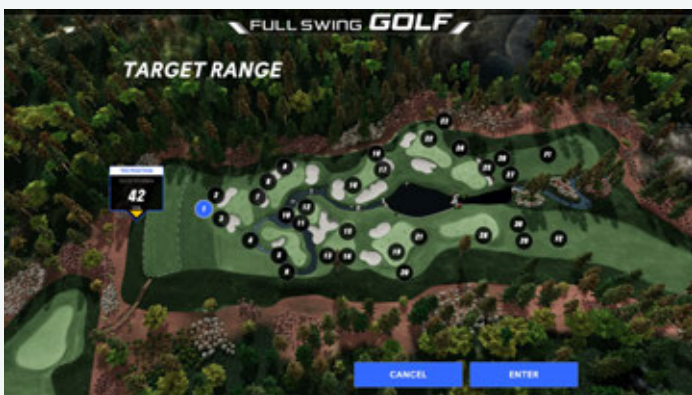

Choose How You Want to Practice

Full Swing Golf gives you every type of practice facility you could dream of to work on your game from chipping to driving. Customizable elements in each area gives you infinite ways to improve your game and review your data.

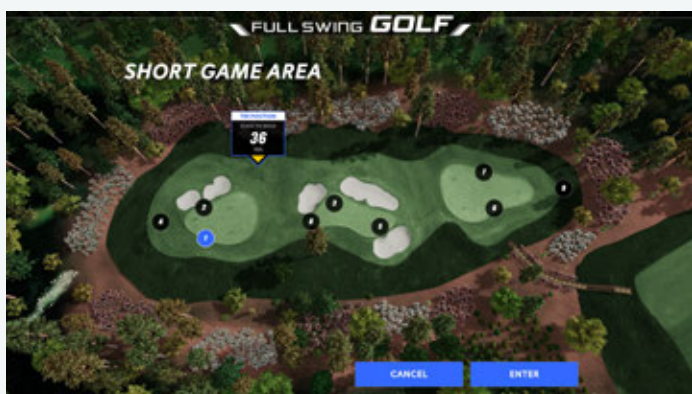

Golf Channel Driving Range with Club Manager

Customize the range you've seen on TV with a target at distance of your choice and review all of your data with our Club Manager. Color code your tracers, label your clubs per shot and view it all in our new expandable dispersion chart in the top left of your screen with each shot's data. Organize and review your shots by club in our shot history, get dispersion charts and learn more from every shot in your practice session.

Target Range

Pick your spot to tee it up and select 30 Different Pins placed on greens ranging from 50-250 yards or aim for two fairways in the distance. Practice hitting shots to tucked pins over sand and water hazards that can get you ready for your round or get your driver dialed in for narrow fairways.

Short Game Area

Practice pitching, chipping and sand shots from just off the green to 100-200 yards depending on where you set your hitting area and target to hit over traps, from the rough, in the trees or just work on short chips to 3 greens that offers 9 pins.
